

# SMS Text Messaging for Microsoft CRM 3.0

SYNC SMS for Microsoft CRM 3.0 allows low-cost text messaging to your CRM contacts and leads. You can text to any network all over the world and create bulk SMS messages integrated with your CRM marketing lists and accounting systems. Messages are pre-paid with prices from just four pence a text and you can buy as few as 100 messages.

SMS functionality is available from the Contact and Lead forms within CRM with messages stored as a phone call in the activity history for future reference.

A search page allows you to send a quick text to a customer or lead without logging in to CRM and you can send text messages to other CRM users. You can also send text messages from your own applications.

Any message you send is configured to reply to your own mobile phone number or to show your company name without the ability to reply. We are building a new generation SMS gateway which will give you incoming text messages directly into CRM and better pricing in the UK.

SYNC SMS for Microsoft CRM 3.0 retails at £495 plus VAT with a reduced price version available for £299 for small CRM installations up to 10 users. Software installation is straightforward and we provide email support for 30 days after purchase. We charge 20% of the software price for annual software maintenance upgrades.

Text message credits are purchased in advance and vary between 4 and 8 pence for most destinations around the world. Texts in the UK cost 8 pence and a full list of message prices by destination is available on our website.

Please contact us on **0845 3010 444** for an evaluation copy which will let you send your first few text messages for free.
